MRS. HURLBUT HOSTESS FOR WOMAN'S CLUE.

Through Her Enterprise and Courtesy They Were Privileged to Enjoy Travel Talke.

Through the enterprise and courtesy of Mrs. L. A. Hurlbut (formerly of Norwich) the ladies of Crescent City were privileged to enjoy a series of most interesting "huvel talks" by Miss C. Dora/ Liculien of Jacksonville, says the Crescent City (Fla) News. These talks occupied pratty nearly every evening or afternoon of the last week, and that the ladies of the place thoroughly enjoyed them was attested by the audience, which was large throughout.

the austlence, which was large throughout.

The Monday, Wednesday and Thursday talks were given in the V. I. A.
hall, while those of Tuesday and Friday were afterneon meetings at the
beautiful Hurbut bungalow. These
home meetings also took on somewhat
the form of receptions, being attended
by some 65 or 70 //isiting and resident
ladies of the place.

Mrs. Hurbut and her guest, Miss
Lieuellen, were in the hallway to receive, and after a short social time the
lecture, or (as Miss Lieuellen prefers
to call them) talks, followed. Her
theme, The Greater Circle of the Orient, occupied the five talks, and the interest which began with the first continued unabated threugh to the last,
but few of the ladies missing any of
them. Miss Lieuellen is a most entertaining talker, and in her travels has
noted many of the more commenplace
happenings but rarely described by the
sverage writer. These, told in a conversational manner, immediately arrest the attention of her hearers, which
is held to the close.

The Tuesday and Friday afternoon
meetings at Mrs. Hurbut's home were
of great social interest, as rarely has
anything in the reception line here
been so elaborately planned and carried to such minute and charming perfection. At the conclusion of Miss
Lieuellen's talk on Friday dainty refreshments of sandwiches, coffee.cakes,
bon-bons and salted almonds were
served and a delightful social time enjoyed. The guests were waited upon
by young ladies of the place. The
Hurbut home was beautifully decorated for the occasion and the day was
ideal. On Friday afternoon the arrangements were much the same as
on Tuesday. But it was the final of
Miss Lieuellen's talks and the ladies
reluctantly said their farewells. Mrs.
Hurbut needed no proof of her graclousness as hostess, but to emphasize
her good will to the Woman's club, she
has turned over the gross receipts of
the courses to that organization. Her

AT THE AUDITORIUM. Vaudeville and Metion Pictures.

There is entertainment for all tastes in the programme at the Auditorium which opened on Thursday for the latter end of the week with large bouses, whose evident satisfaction was apparent in the plenteous appleaus given for the varied acts, each a strong ope in its class. The Taylor Sisters skated their way into popular favor on the rollers with their intricate movements, in which they do a quadrille among a lot of bottles standing on the stage, and also play violins while skating.

Marzello and Wulff, an acrobatic pair, are on hand with some thriling work on the horizontal bars, and get the house with their comedy wrestling match, which is done with great cleverness. Some Hard Luck.

"Every time I read of a trainload of people being relieved of their valuables by a lone bandit or two, it reminds me of an actual happening to an uncle of mine." remarked a Butter school teacher the other day, as she tooked up from her paper, after glancing at the bold headlines that told of a robber going through a train, "and it is what I choose to term 'the original hard-luck story."

"It was some years ago, when my uncle was crossing the country on one of the hig transcentinental trains. He was asleep in his berth, when he was suddenly awakened by the train heing brought to a short stop. Soon he heard a hubbub of voices and the rough commands of the bandits to throw up their hands, threatening death if the commands were not obeyed. Some Hard Luck.

death if the commands were not obeyed.

"He had a revolver in his berth, and his first impulse, as he told afterward, was to get it ready for action. But his thoughts changed when the rough tones came to his ears. He just put the revolver away and began to get his money ready to hand over, for the robbers were approaching his berth.

"Just as he was getting his money—he had about \$200—he had a happy thought. This was to put a \$20 gold piece in a sock and slip the sock in at the side of the berth. So he picked out the coin and put it away safely.

"The robbers came to his berth, demanded his money and got it, but the crafty gent laughed to himself as he thought of the piece of money he had saved.

"Well, when the robbers had searched the train thoroughly and departed, my uncle thought he would

"Well, when the robbers had searched the train thoroughly and departed, my uncle thought he would recover his \$20 gold piece and display to his fellow passengers how he had fooled the bandits. So he went down after the sock at the side of the berth and pulled it forth, held it upside down and the coin rolled out. It was a quarter."—Portland Express.

A Market for Small Bonds.

This is the day of the "small investor," and as he is pretty numerous it appears to be a wise thing to do to put out commercial paper in sizes that he can financially handle.

Already some municipalities have issued small bonds and in most every case, where offered to the public at large, were snapped up quickly. The odd-lot of bond buying has stimulated an agitation for bonds of smaller denomination than \$1,000, which has been everlooked in this regard and as a consequence the general investment market has lost patronage that would otherwise belong to it if small bonds were on the market, available at any time.

In the stock markets the importance of the odd-lot buyer is below realized. A Market for Small Bonds.

were on the market, available at any time.

In the stock markets the importance of the odd-lot buyer is being realized and many stock exchanges now make it a noint to cater to this class of customer. The question is asked, why should not bond houses do the same? From the demand for small bonds abroad it is predicted that within the near future the \$100 denomination will be freely used in this country. It would at least tend toward an increase in thrift.—Indianapolis Star.

emancipated negroes to a new species of servitude it was not long in delaying its application to poor immigrants who came within its reach. This is what first invoked attention to the nefarious system and caused the downfall pronounced in the solemn decree of the supreme court.

Without describing the provisions of this peonage system, it is enough to say that it is legalized an iniquitous means of holding men in bondage and extorting from them the utmost possible service for the least possible compensation. If a poor man persecuted by fortune entered into a contract for labor with a dealer in this system of peonage to pay a debt or meet some other obligation, chicanery was frequently employed to hold him in servitude beyond his stipulated term. If the bondsman was suspected of an attampt to escape, force was often employed to retain him and keep him at his task. But in the mildest and most equitable way in which such a law could be administered it was an iniquity.—Philadelphia Record.

Laws Enough in Vermont.

The Vermont legislature has been in session but a short time, but it is expected to be ready to adjourn on January 21. Very little in the way of new legislation will be done. The senate has voted down a proposition to levy an inheritance tax, and the house of representatives, after passing a primary election bill, reconsidered and killed it. The fury for new laws which prevails in most of the states, does not show itself in the Green Mountain state.—Hartford Times.
